### **DETAILED ACTION**

Claims 1-12 are pending.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1- 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ito et al US 5334594 .

Applicants claims are drawn towards the 3-[4-(8-fluoro-5,11-dihydrobenz[b]oxepino[4,3-b]pyridin-11-ylidene)piperidino]propionic acid or ester or its acid addition salt.

#### ***Scope & Content of Prior Art MPEP 2141.01***

The reference teaches the propionic acid and its salts . See example 14 in column 24.

The reference also teaches the acid salts . See column 4 lines 5-17.

The ester of the Chloro compound is disclosed. See the disclosure in column 2.

***Prima Facie Obviousness , Rational and Motivation MPEP 2142-2413.***

One of skill in the art would have been motivated to make the salts of the esters of the Fluoro derivative as these are also disclosed and the teaching of the salts and esters are also disclosed. Thus the compounds and the process of making them are prima facie obvious as the options are very limited and there is a clear disclosure that it would be predictable that the acid addition salts of the esters of the Fluoro derivation, a compound already disclosed, coupled with the fact that the teaching that pharmaceutical salts are also taught.

### ***Conclusion***

Claims 1-12 are rejected.
